DETAILED ACTION

In this application:

Claims 1-20 are now pending and under examination.

Drawings

The drawings are objected to under 37 CFR 1.84 or 1.152 for the reasons stated on PTO 948. Correction is required.

Claim Rejections

35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1802

35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Horiuchi et al or Cathey, Jr.

Horiuchi et al (US Patent 5,155,331) disclose an etching apparatus comprised of two electrodes and a holding body for holding a substrate. The apparatus is also comprised of a sealing ring and a clamp. (See especially columns 3-5)

Cathey, Jr (US Patent 5,096,536) disclose an apparatus for plasma etching comprised of an upper and lower electrode , clamps, o-ring sealing members, and a central opening in the lower supporting electrode. (See especially columns 4 and 5)

Thus, the prior art disclosures are viewed as anticipating the claimed invention.
